DETAILED ACTION

1. This is in response to applicant argument filed August 28, 2006, in which claims 1 through 27 are pending.

After further search and examination of the present applicant and in view of applicant's argument, claims 1-27 are found to be in condition of allowance.

Allowable Subject Matter

2. Claims 1-27 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance: the prior art Bruckert et al (US 5,920,549) teaches the wireless communication device, a receiver searcher 9109) that measures the signal strength of a an active pilot from active base stations and neighboring pilot base stations simultaneously using finger receives 107 (see abstract).

On the other hand, the present applicant specifically teaches the remaining ones of the base stations of the active set are monitored in a time multiplexed manner by a third set of fingers (see page 12 applicant's argument). These limitation, in conjunction with all other limitations, has not been disclosed , taught , or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
